## Manufacturing Assembler

**Nustream LLC**, of Mansfield Center Connecticut, is a rapidly growing, design and manufacturing company that makes technically unique hydro turbines and related products. Working in collaboration with a platform of companies owned by a private equity firm in the UK, we engage with a broad variety of customers including Ford, General Motors, Rolls Royce, Volkswagen, Siemens, GE and Pratt and Whitney. Our platform's customers are located all over the world including China, South America, India and all of Europe.

As with all of our people, we value employees that exhibit the following traits:

- Have the strength to be able to provide influence as well as the humility to learn from the surrounding talent.
- Engage in the business and live the commitment while having a strong sense of work-life balance and an appreciation of responsibility to community.
- Lead with ambition and energy while exhibiting tolerance and patience.
- Set the highest of goals and expectations for themselves and their company while accepting the commitment and focus necessary to achieve goals without shortcuts.
