

Who We Are

NuSTREEM produces modular, standard, digital, continuously optimizing, and easily maintainable hydropower equipment. NuSTREEM's product is based on technological evolutions that make a significant difference in the performance of a long-accepted hydropower turbine paradigm.

The performance changes we have developed eliminate the need for a dam, offer a decentralized generation capability, the ability to harvest energy from existing hydropower intensive systems, and provide a low environmental impact, all with a low setup and procurement cost.

Our team believes in our product, not only in its ability to make an economic difference to our customers but also in its ability to be at least a partial answer to the responsible power-generation needs of our community and our world.

Introducing the NuTECH™ Controller Pilot Program - Increased efficiency for your hydro site.

NuTECH™ Controller

The NuTECH™ Controller ensures optimal hydro power system output continuously regardless of any potential variable and is the brains behind our reliable and efficient NuSTREEM dual-regulated Kaplan turbine.

The patented NuTECH™ Controller provides the intelligence to tap the unused potential of any Kaplan turbine by maximizing efficiency regardless of the hydraulic or machine conditions.

Proven Efficiency

“

NuSTREEM has a proven design to meet the demands for modular and intelligent turbines

”

Irrigation Leader Magazine

PILOT PROGRAM

For a limited time, receive a free controller and installation with participation in a data sharing agreement.

No investment. No surprises. Free efficiency gains.

CASE STUDY

Our efficiency-enhancing control algorithm optimizes your turbines performance with any change in conditions, including flow variability, water levels, wear on turbines, blockages, and more.

Our patented algorithm has seen up to a 20% increase in efficiency.

Read our case study at www.nustreem.com.
